

EnviroInfo 2017

From Science to Society: The Bridge
provided by Environmental Informatics

MAISON DE L'INNOVATION

The EnviroInfo 2017 is the 31st edition of the long standing and established international and interdisciplinary conference series on leading environmental information and communication technologies.

For the first time, EnviroInfo will be organized in Luxembourg by the Luxembourg Institute of Science and Technology (LIST).

➔ Luxembourg
➔ 13-15 September 2017

Chaired by Dr. Ir. Benoît Otjacques (LIST) and Prof. Dr. Stefan Naumann (Trier University of Applied Sciences)

Luxembourg and LIST offer a unique setting for the conference. First, the country is at the intersection of the German and French-speaking communities that each have different societal views on environmental topics and challenges. Second, Luxembourg is specifically challenged by environmental issues that cross borders, be it the impact of environmental disasters, emissions caused by the transborder mobility due to the international workforce of the country, or the interoperability of environmental decision systems in general. Finally, Luxembourg and LIST are very much interested in research with a measurable positive impact on the society.

All these challenges are common to many Environmental Informatics projects. Luxembourg's particular location makes the country an excellent place to discuss these topics.

LIST is looking forward to seeing you at the EnviroInfo 2017!
